

# Mountain to Sound Greenway Trust Spring Breakfast 2025

## ZERO WASTE EXECUTIVE SUMMARY

### WASTE DIVERSION

Type of Waste	Weight
Compost	16.4 lbs
Recycling	0.4 lbs
Trash	3.2 lbs
Total Waste Generated	20 lbs
Total Waste Diverted	84%

Congratulations on a fourth year of diverting and eliminating waste at the Mountain to Sound Greenway Trust Spring Breakfast with Perennial Zero Waste!

During this breakfast event, using reusable glasses, mugs, and plates, you prevented

**631 single-use cups**  
**321 single-use plates**  
and  
**641 utensils**

from being wasted!

The breakfast only generated 20 pounds of waste, all of which was properly sorted into recycling and compost to divert the maximum amount of waste from the landfill as possible.

Most recyclable material was from outside sources brought in by event attendees. Trash was mostly comprised of individual coffee creamers and plastic packaging from the catering service. All food waste from plate scraping and stir sticks were composted accordingly.

In total, 84% of all waste was diverted from the landfill!
