

Mountains to Sound Greenway Trust Spring Breakfast 2025

ZERO WASTE EXECUTIVE SUMMARY

WASTE DIVERSION

Congratulations on a fourth year of diverting and eliminating waste at the Mountains to Sound Greenway Trust Spring Breakfast with Perennial Zero Waste! During this breakfast event, by opting into using reusable glasses, mugs, and plates, you diverted from landfill:

631 single-use cups
321 single-use plates
and
641 utensils!

Throughout the breakfast, only 20 pounds of waste was generated, all of which was properly sorted into recycling and compost to divert the maximum amount of waste from the landfill. Most recyclable material was from outside sources brought in by event attendees. Trash was mostly comprised of individual coffee creamers and plastic packaging from the catering service. All food waste from plate scraping and stir sticks was composted accordingly. In total, 84% of all waste was diverted from the landfill!

Type of Waste	Weight
Compost	16.4 lbs
Recycling	0.4 lbs
Trash	3.2 lbs
Total Waste Generated	20 lbs
Total Waste Diverted	84%
