

Supporting the Greenway Trust

The business community has been a crucial partner in the mission of the Mountains to Sound Greenway Trust since our inception in 1991. Through direct giving, in-kind contributions, board service, and volunteer work, local companies have steadfastly upheld this community's profound love for nature. By supporting healthy rivers and forests, accessible parks and trails, strong, connected wildlife corridors, and sustainable outdoor recreation, our corporate partners invest in the health and happiness of their employees.

The Greenway Trust proudly works in partnership with local businesses to connect employees to their natural surroundings through volunteer stewardship work. For companies who wish to organize a custom event during the work week, we can work together to find an appropriate project for the size of the group (minimum 10 people) and time frame (minimum 3 hours).

In consideration of the limited nature of resources, we ask that companies make every effort to include a financial contribution when collaborating on a custom volunteer event (guidelines below). These contributions directly support the staff and resources needed to plan and host an effective, educational, and enjoyable event.
